PROFILE

My background in both communications and the creative industry has shaped my interest in how people connect with communities and experiences. I'm a Communications and Music student at UW with experience promoting events, working directly with clients, and creating engaging marketing content. Through years of collaborating in live performance and studio environments, I've developed strong organization and problem solving skills while learning how to build meaningful relationships with diverse groups of people.

Through years of experience in similar fields, I've developed skills in creating welcoming environments, helping others feel informed, and representing organizations with professionalism. Whatever the work may be, I enjoy team-oriented settings and delivering exceptional service.
